

Transducerized Pulse Tools

Customer: Automobile Manufacturer in India

Tools Used:

Yokota System Wrenches
YEX models

YEX-901, YEX-1400,
YEX-3000

Benefits to the customer:

Customer needed higher production output, with record of all tightening data.

After using the transducerized **YEX** tools, the customer does not need to check every bolt-tightening afterwards due to high accuracy of system wrenches. At the same time, the customer receives all the tightening data (Torque, number of im- pulses) through a LAN Ethernet connection to his mainframe.

Conclusions:

Increased productivity.

Tightening data takes care of traceability!

Handheld tools – reaction free!
