

Transducerized Pulse Tools

Customer: Seat Manufacturer in India

Tools Used:

Tka 60, Tka 80, Tka 90, Tka 110 and controllers

Benefits to the customer:

Earlier Customer was using DC Tools on their assembly line but was facing high takt time and low production volumes.

After using Yokota System Wrench with high tightening speed, the customer has been able to reduce the takt time on the production line. The low weight and low reaction forces enable the operator to handle the tool with great flexibility around the product.

Conclusions:

- High Speed Operation
- Error-proof tightening
- Very low reaction forces during tightening
