

NAME: Carbon-Brush Screwdrivers Power controller

MODEL: SKP-32HL1-40W / SKP-32HL-40W / SKP-32VR-40W / SKP-32HL-60W / SKP-32VR-60W / SKP-32HL-2H

Product Description

- ☛ Input voltage: AC110V and AC 220V two selection.
Output voltage: DC24V and DC32V two selection.
For your proper usage, please see the specifications in following.
- Power switch: ON/OFF indicator. Two kinds of voltage output: Hi & Lo.
- SKP is kind of intelligence controller runned by power. Input of 100V-240V by AC power source lets 100V-120V and 220V-240V be acceptable.
Smaller size,light weight and easy to use are SKP's significant features.
- SKP-32HL means output with two,32V and 24V,for users to choose.
SKP-32VR means it can be freely adjusted,from output 32V to 24V,to meet the needs of certain work by users.
- As voltage of SKP is adjusted below 32V or LO, the electric frequency will be lowered either so that the torque of electric screwdrivers can't be worked out except below scals of 4.
- With grounding device, for eliminating static (ESD) anti-EMC
SK-DU1, SK-DU2 function with overload jump-off switch and manual reset device.
- Equiped with USA plug (equiped with Chinese 3-pin plug, UK plug or European plug etc.)
